

Aura Conference Speaker™ Bluetooth and USB

Model MCP-BT-USB

AURA CONFERENCE SPEAKER™

Clear sound. Anywhere you meet.

Not every meeting happens at a desk. The Aura Conference Speaker goes wherever you do — home office, huddle room, hotel room, or conference table — and delivers clear, room-filling audio without the setup hassle.

Bluetooth 5 connects wirelessly to your phone, tablet, or laptop in seconds. USB plugs straight into your PC or Mac with no drivers required. Connect up to three devices at once so you can switch between your laptop and phone without re-pairing. Two omni-directional microphones pick up voices from across the room, up to 9 feet, so everyone in the conversation gets heard.

Up to 15 hours of battery life gets you through a full day of meetings. The included carrying case keeps it protected between uses. Compact enough to slip into a bag. Powerful enough to run the room.
