

Blunote Turbo™

Bluetooth® TWS Wireless Speaker with Mic Model WS-5010

BLUNOTE TURBO™

Big Sound. Built for Wherever You Take It.

The Blunote Turbo is a 20-watt portable Bluetooth speaker built for people who don't want to leave good audio behind. Waterproof to IPX5, it goes poolside, to the beach, or anywhere else you'd rather not bring something fragile.

Connect via Bluetooth from your phone, tablet, or PC/Mac. No signal? The SD card slot plays your saved music without a paired device, and built-in FM radio gives you another option when you're off the grid. When you need more coverage, pair two Blunote Turbos via True Wireless Stereo for a full left-right stereo setup — one at each end of a table, a deck, or a room. The built-in microphone handles calls as well. Twelve hours of battery keeps it going through a full day out. Charges via USB-C.
