ZūM Maestro DECT USB™ Headset HS-3010

Wireless Headset for Secure Softphone Environments • Range up to 350 feet

USB connection to workstation. Compatible with Microsoft Teams Government, Cisco Webex, and other VoIP platforms approved for secure environments.

WIRELESS FREEDOM. ZERO BLUETOOTH EXPOSURE.
DECT Wireless for Softphone. No Bluetooth. No Pairing Vulnerabilities.

When your organization runs voice communications through VoIP or unified communications platforms, the headset becomes part of your security posture. The ZūM Maestro DECT USB operates on the dedicated 1.9 GHz DECT 6.0 spectrum, completely separate from Wi-Fi and Bluetooth, eliminating the pairing exploits and signal interception risks that Bluetooth headsets carry by design.

Connect via USB to any Windows or Mac workstation. Up to 350 feet of wireless range keeps personnel mobile within secure facilities without introducing wireless vulnerability. Noise-canceling microphone and DSP audio processing ensure voice clarity in high-noise environments: open-plan operations centers, dispatch, and shared workspaces.
